

Customize Your Blackboard Course List

The Course List module displays all available courses in which you have been enrolled. To make the list more manageable, you can edit it to display only specific courses and information.

1. Click the **manage settings icon** in the top right corner of your Course List.

2. On the Personalize: Course List page, select the information you want displayed for each course and use the move arrows \updownarrow to re-order the list. If nothing is selected, the course will not appear in your list.

Note: You can use the *Select All* check box to display or hide ALL course information for a particular course.

Courses in which you are enrolled:
